

Website Content and SEO Report

Jazeerat Al Hadeed Metallic Cont Ind LLC · New company website · Prepared for Mr. Shambu · 8 October 2026

4.0 / 5

overall content and keyword score across the 17 pages of the new website. It was 3.7 before the pre-qualification document was used.

1. Summary

- **The website content now comes from company documents.** Most of it is taken from the 2026 pre-qualification document, the ISO certificates and your instructions.
- **Every page has its own search keyword**, chosen from the wording used by fabricators that currently appear on Google for Sharjah, Dubai and UAE searches.
- **Your two corrections are applied:** the 50 mm plate figure is removed everywhere, and cutting and marking services (cutting on demand) are added.
- **The new site is not on jahsteel.ae yet.** It runs on a test address until the content is approved. Google will only show it after the domain is switched.
- **Scores are our judgment**, made by comparing each page with pages that rank now. They are not Google rankings. Search volumes have not been checked yet.

2. Where the content comes from

Source	What it was used for
Pre-qualification document 2026	Services, 7,000 m² shop floor, machinery, teams, mission, vision, values, third-party certified 6G welders, pre-engineered buildings, district cooling works, Saudi Arabia project, parent company (Island Tower Electromechanical Works LLC)
ISO certificates	ISO 9001:2015 and ISO 14001:2015, registered company name, P.O. Box 61204
Company profile	Established 2019 after acquiring Carlton Steel Works LLC; Sharjah workshop operating since 1983
Your instructions	No 50 mm plate; cutting and marking on demand
Web team	Dubai head office address, phone numbers, opening hours, the five current projects

4. Service pages

Service page	Search keyword	Added from the pre-qualification document	Score
CNC Laser & Plasma Cutting	CNC laser cutting services Sharjah	Cutting and marking on demand (your instruction)	4.2
Welding & Quality Control	structural steel welding services Sharjah	Third-party certified 6G welders; argon, TIG and MIG welding	4.1
Steel Detailing & Shop Drawings	Tekla steel detailing services UAE	Tekla and Tekla PowerFab	4.0
Structural Steel Fabrication	structural steel fabrication Sharjah	PEBs, factories, district cooling plants, 7,000 m ² workshop, ISO certificates	4.0
Custom Steel Fabrication	custom steel fabrication UAE	Platforms, riser frames, handrails, ladders, gratings, filter housings, pump skids	3.9
Plate Bending, Rolling & Drilling	plate bending and rolling services Sharjah	Lathe and milling work, pipe bending, pressing, shearing	3.9
Surface Finishing	steel painting and galvanizing UAE	Sandblasting and spray painting, hot-dip galvanizing	3.8
Steel Erection & Installation	steel structure erection company UAE	On-site erection and installation team	3.8
Estimation & Material Takeoff	steel estimation and material takeoff UAE	Estimation team, Tekla PowerFab	3.8
Structural Design & Engineering	structural steel design UAE	Design as part of the design-to-erection service	3.7

Each service page also has its own customer questions and answers. Each page has about 200 to 280 words. Competitor service pages are usually longer, which is the main reason these are not higher.

5. Competitor keywords

We searched Google for the main terms and looked at the wording used by the companies that appear.

Wording competitors rank with	Where we now use it
steel fabrication company in Sharjah	About page title and main heading
structural steel fabrication company in UAE	Home page title and main heading
CNC laser cutting services in Sharjah	CNC cutting page
plate bending and rolling services	Plate bending page
welding services in Sharjah	Welding page
Tekla steel detailing services	Detailing page
steel structure erection company UAE	Erection page
sandblasting and painting, hot-dip galvanizing	Surface finishing and Facilities pages
pre-engineered buildings (PEB)	Structural fabrication and Facilities pages
